Repos: https://github.com/jsecomb/lootTracker | https://github.com/SaskuatchofAZ/LootTrackerExtension

RELEVANT EXPERIENCE

Please see my portfolio of web dev projects at https://bruggineer.github.io/React-Portfolio/#/

Front End Developer, UI Designer 2012-2015   **Databliss LLC** Fort Collins, CO

Refactored a non-responsive Flash website into a device agnostic, responsive app using contemporary web standards with no loss of functionality or alteration of appearance. Designed and created bespoke static web sites for small businesses. Designed internal system dashboards for two major retailers.

Instrument Specialist III 1998-2011   **Sunquest Information Systems/Misys** Tucson, AZ

Installed, customized, and maintained medical laboratory instrumentation interfaces. Successfully managed a high-profile client load. Increased team workflow by over 25% through process improvement. Excelled at user-group technical presentations. Expanded company knowledge base with clearly written, proven solutions.
